

Worksheet # 9

Week 5, Day 1: Elements of visualization, choosing a plot, correlation, perception

Name: _____

NetID: _____

Date: _____

Guided checkpoints (optional)

1. Bertin's Seven Visual Variables

List all seven variables.

2. Munzner's Magnitude Channels

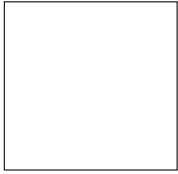

List the "top five" magnitude channels

3. Choosing a Plot: One Quantitative Feature

Name three plots for a single quantitative feature.

4. Pearson's Correlation Coefficient

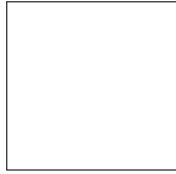

Sketch a scatter plot for each panel.

$r \approx 0.9$

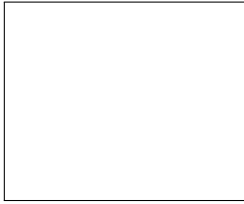

$r \approx 0$

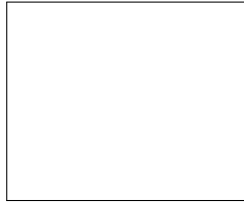

$r \approx -0.5$

5. Simpson's Paradox

Sketch the same data twice (with trends).

pooled

split by group

6. Choosing a Plot: Two Variables

Name and sketch a plot for data with **two categorical** variables. (And for **one quantitative and one categorical** variable, if you want)

7. The Principle of Proportional Ink

Write down the principle.
