- Test quote

“The greatest value of a picture is when it forces us to notice what we never expected to see.” — John Tukey

Incremental Bullets

Tabsets

Tab A

Tab B

Content for `Tab A`

Pretty Code

- Syntax highlighting works in revealjs slides
- Code uses the theme's Courier stack

```
1 import polars as pl
2
3
4 def summarize_ridership(stations: pl.DataFrame) -> pl.DataFrame:
5     return (
6         stations
7         .group_by("line")
8         .len(name="station_count")
9         .sort("station_count", descending=True)
10    )
```

Line Highlighting

```
1 import numpy as np
2 import polars as pl
3
4 stations = pl.read_csv("cta_stations.csv")
5 orange = stations.filter(pl.col("line") == "Orange")
6
7 by_access = orange.group_by("accessible").len(name="station_count")
8 share = np.round(
9     by_access["station_count"] / by_access["station_count"].sum(),
10     2,
11 )
12
13 print(by_access.with_columns(accessible_share=share))
```

Column Layout

Course Pattern

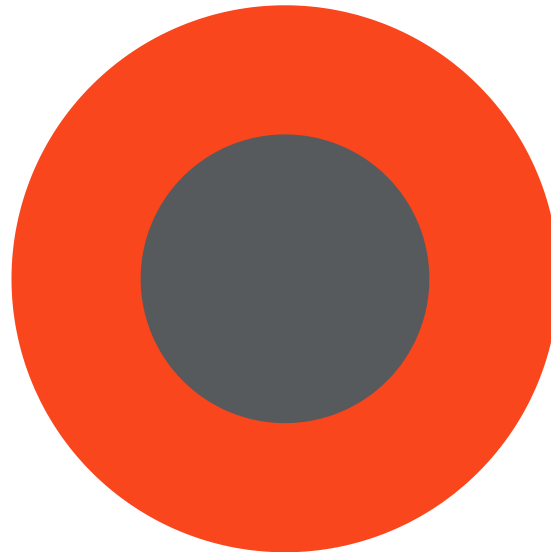

- Ask a data question
- Find the relevant table
- Check the units
- Make a readable view

Week	Focus
0	Setup and orientation
1	Blah blah
2	Blah blah blah
3	Blah blah blah blah

Florence Nightingale's Mortality Diagram (1858)

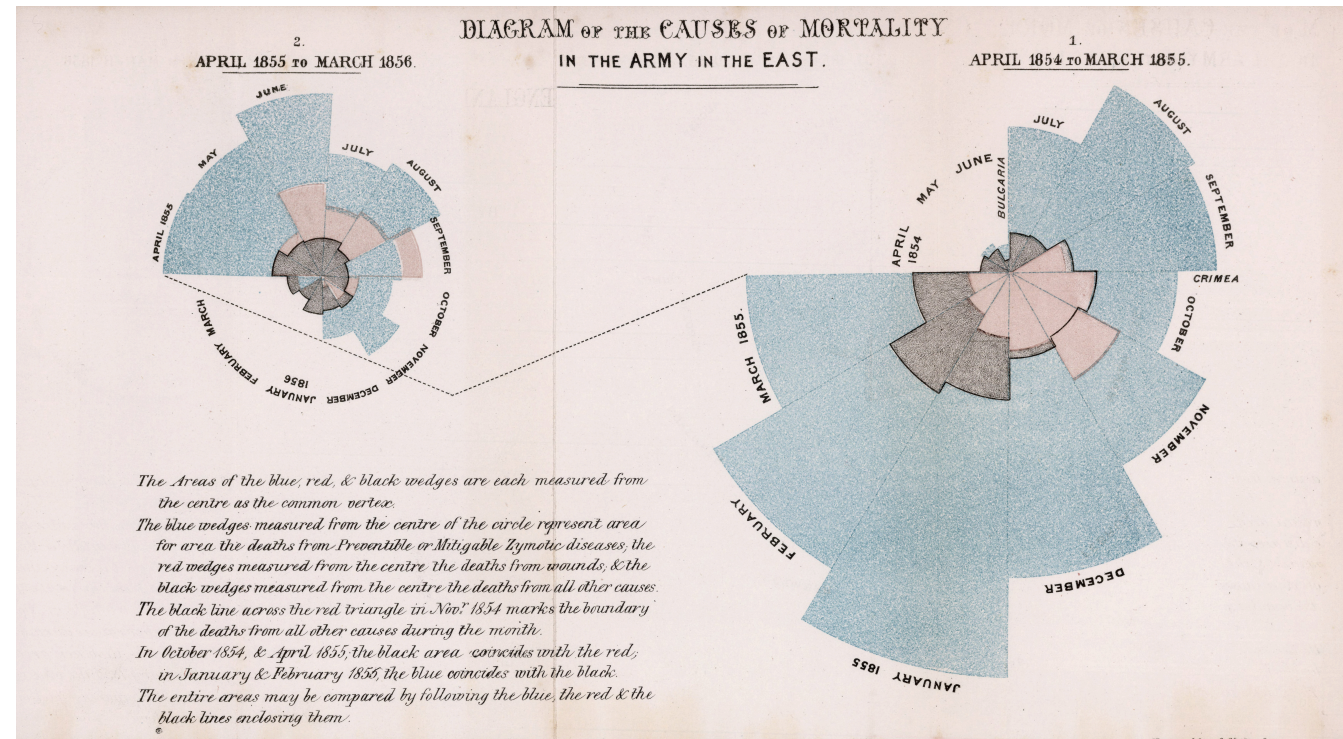

A **polar area chart** showing causes of mortality in the Crimean War:

- Blue: deaths from preventable disease
- Red: deaths from wounds
- Black: other causes

Used to advocate for sanitary reforms in military hospitals.

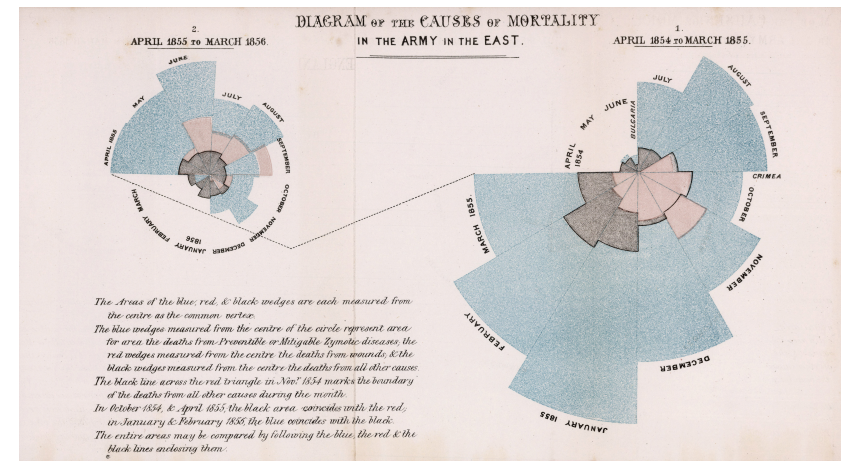

Florence Nightingale's Mortality Diagram (1858)

follow-up slide for nightingale
